As a frontend developer with four years of experience, I specialize in using React to create engaging and responsive user interfaces. I have expertise in designing, developing, and implementing web applications that deliver exceptional user experiences. My technical skills include proficiency in HTML, CSS, JavaScript, Bootstrap, jQuery, Ajax, Material UI, and TypeScript. I have experience working with multiple databases and developing scalable, efficient, and flexible modules using agile methodologies. Additionally, I have strong knowledge of MVC frameworks such as React and Laravel. As a product developer, I use tools like Jira, Confluence, and Mind maps to design, develop, and deliver products.

Skills

- React
- JavaScript
- TypeScript
- HTML/CSS
- Tailwind/Bootstrap
- Laravel
- PHP
- GraphQL
- MySQL
- MongoDB
